Knowledge Check

Module 4: Accessible PDFs with Adobe Acrobat

Designing and Delivering Accessible Online Courses. Licensed CC BY 4.0.

This is the printable version of the interactive knowledge check on the course website. 6 questions. Circle one answer for each, then check your responses against the answer key at the end.

Questions

1. What makes a PDF readable by assistive technology?

A. Tags that define structure and reading order B. A high resolution scan C. A large font size
D. Being under 5 MB

2. Where do you set a PDF's title and language in Acrobat?

A. Menu, then Document Properties B. Edit, then Preferences C. View, then Page Display D.
Tools, then Organise Pages

3. You open a PDF and cannot select individual words with the cursor. What does that indicate?

A. It is a scanned image with no text layer, so a screen reader gets nothing B. The document
is password protected C. The font is embedded D. The file is corrupted

4. What is the best way to produce an accessible PDF from a Word document?

A. File, Export, Create PDF/XPS, with document structure tags enabled B. File, Print, then
choose Print to PDF C. Save As, then change the extension to .pdf D. Screenshot each page
and combine the images

5. After running the accessibility check and resolving findings, what must you do?

A. Save the document B. Close without saving C. Re-run optical character recognition D.
Flatten the file

6. Which is the most common accessibility barrier in higher education course materials?

A. The untagged or scanned PDF B. Videos that are too long C. Files that are too large to
download D. Documents using an unusual font

Answer key

1. A, Tags that define structure and reading order

Tags are what turn a PDF from a picture of a page into a document with structure.

2. A, Menu, then Document Properties

Document Properties, under Description for the title and Advanced for the language.

3. A, It is a scanned image with no text layer, so a screen reader gets nothing

The cursor test is the fastest way to identify a scanned PDF. Optical character recognition is needed before anything else.

4. A, File, Export, Create PDF/XPS, with document structure tags enabled

Print to PDF discards structure. Export with structure tags preserves headings, lists, table headers and alt text.

5. A, Save the document

The accessibility work is not stored until the file is saved.

6. A, The untagged or scanned PDF

The scanned or untagged PDF, and it is often a required reading.
