

The Adobe Acrobat Interface

Adobe Acrobat PDF 3 Main Views

Adobe Acrobat includes three main views: **Home**, **Tools**, and **Document**. Depending on the version you use, some features may appear in different locations.

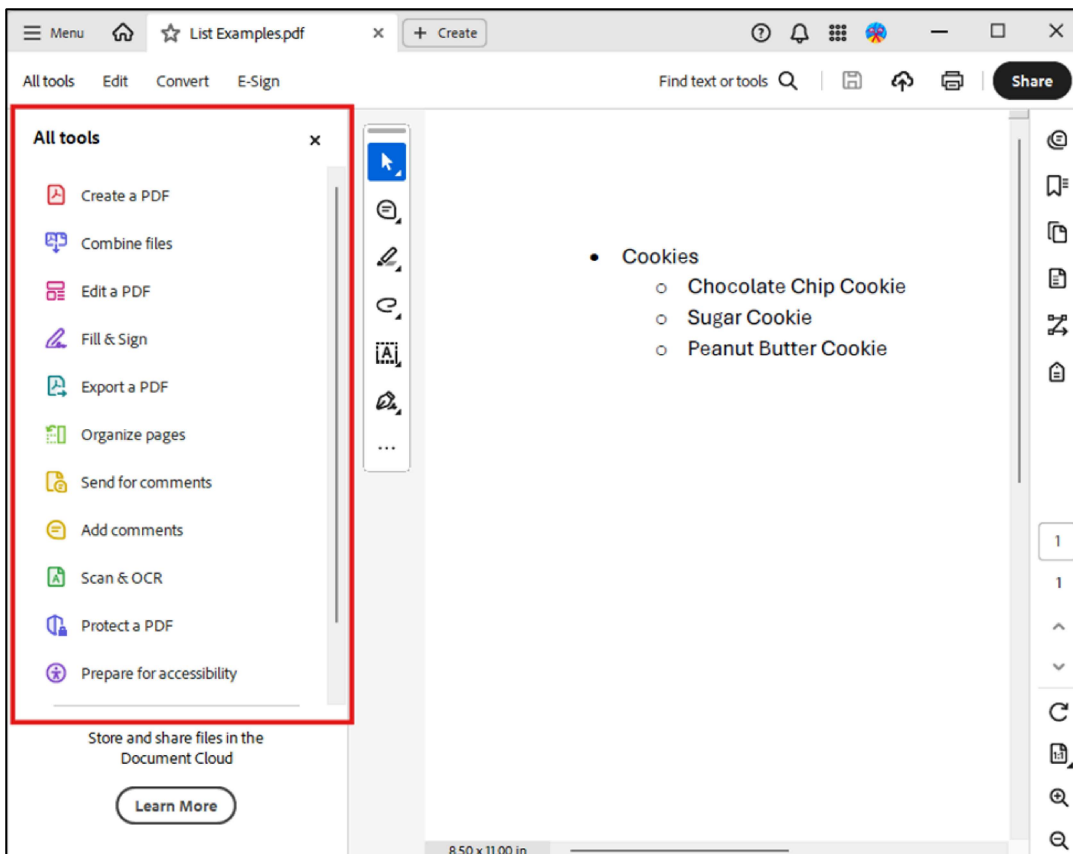

Home view

Displays the first screen you see when Adobe Acrobat opens.

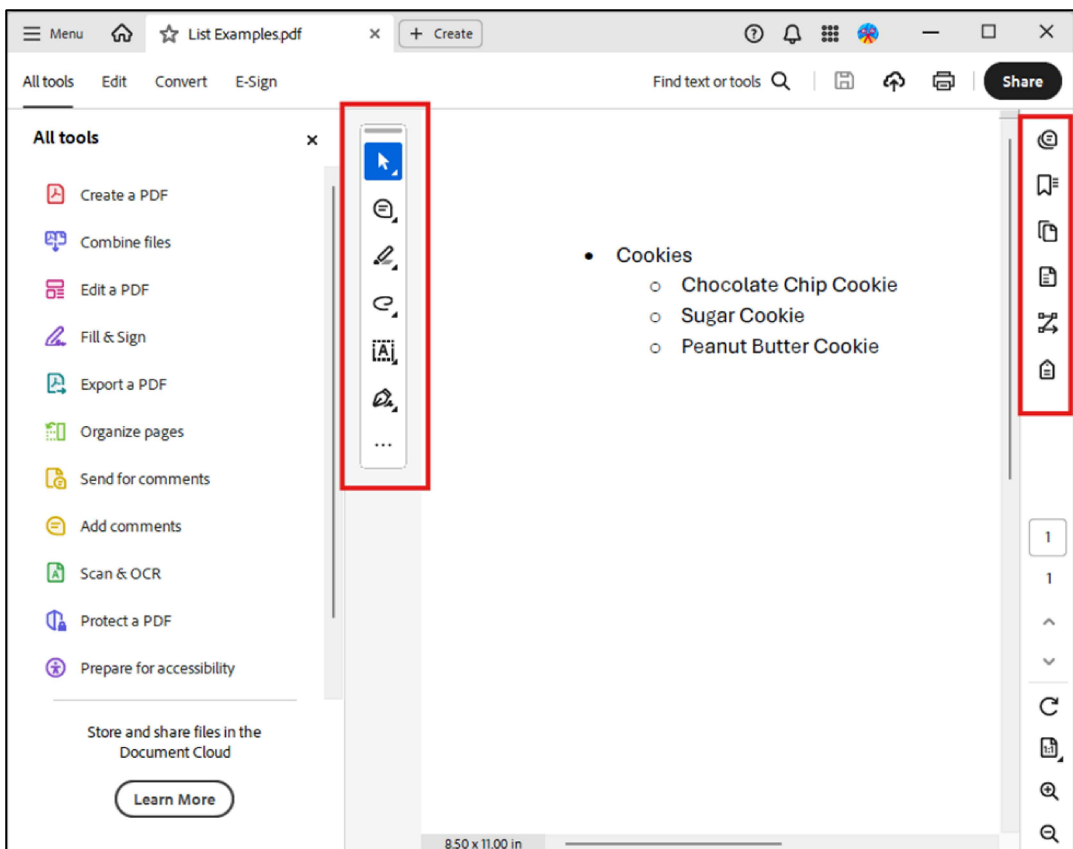

Tools view

Provides access to features such as the Accessibility Checker, editing tools, and PDF organization options.

Document view

Displays the open PDF for viewing and editing.

Accessibility Features

Adobe Acrobat includes several features that support both document authors and individuals with disabilities. To access these features, open any PDF document from your course.

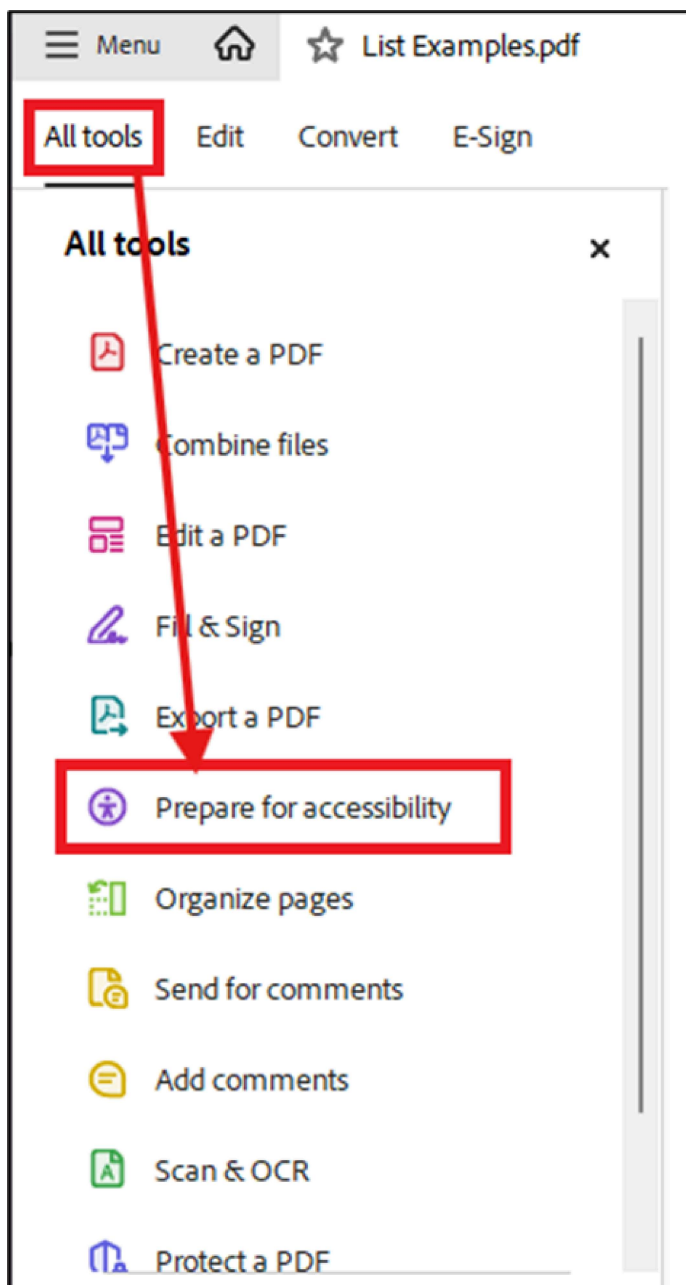

(Optional: You may also download and use [InaccessibleFile.pdf](#)

(<https://tamut.instructure.com/courses/6602/files/1367499?wrap=1>)_ ↓

(https://tamut.instructure.com/courses/6602/files/1367499/download?download_frd=1) for practice.)

Accessibility Tool

The Accessibility tool is located under **All tools** and is labeled **Prepare for Accessibility**. Tools can be reorganized by dragging and dropping them within the Tools panel.

Side Panels

Adobe Acrobat includes several side panels that support PDF accessibility tasks. To open these panels:

1. Select **Menu** to open the application menu.
2. Select **View > Show/Hide > Side panels**.
3. Make sure the following panels are checked:
 - A. Accessibility tags
 - B. Bookmarks
 - C. Order
 - D. Pages
